# C++ Programming Homework #13
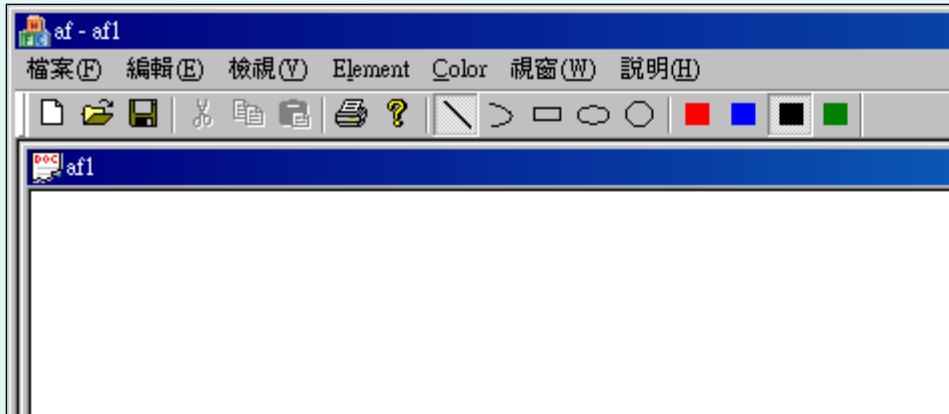

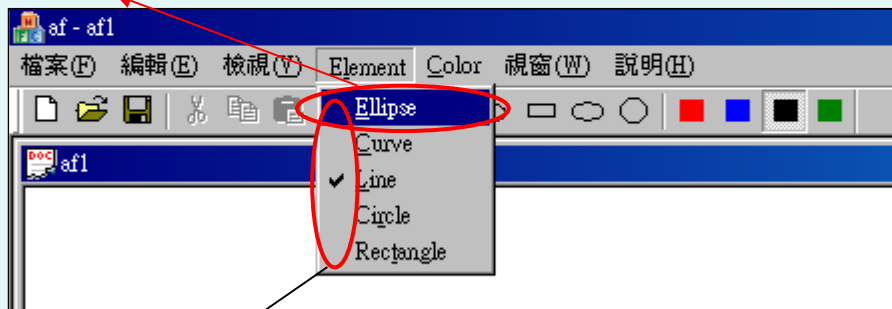

Speaker: Wen-Jen Lin

Date: 2008.05.16

HW13

- Based on the example developed in Chapter 13

- Generate the example code step by step according to Ch13, then done the below exercises.

  - Add a menu item *Ellipse* to the Element pop-up.
  - *Implement* the command and command update handlers for it in the document class.
  - Add a toolbar button corresponding to the *Ellipse* menu item and add a tooltip for the button.
  - Modify the command update handlers for the color menu items so that the currently selected item is displayed in **uppercase**, and the others are displayed in **lowercase**.

According to CH13, to generate the example code step by step
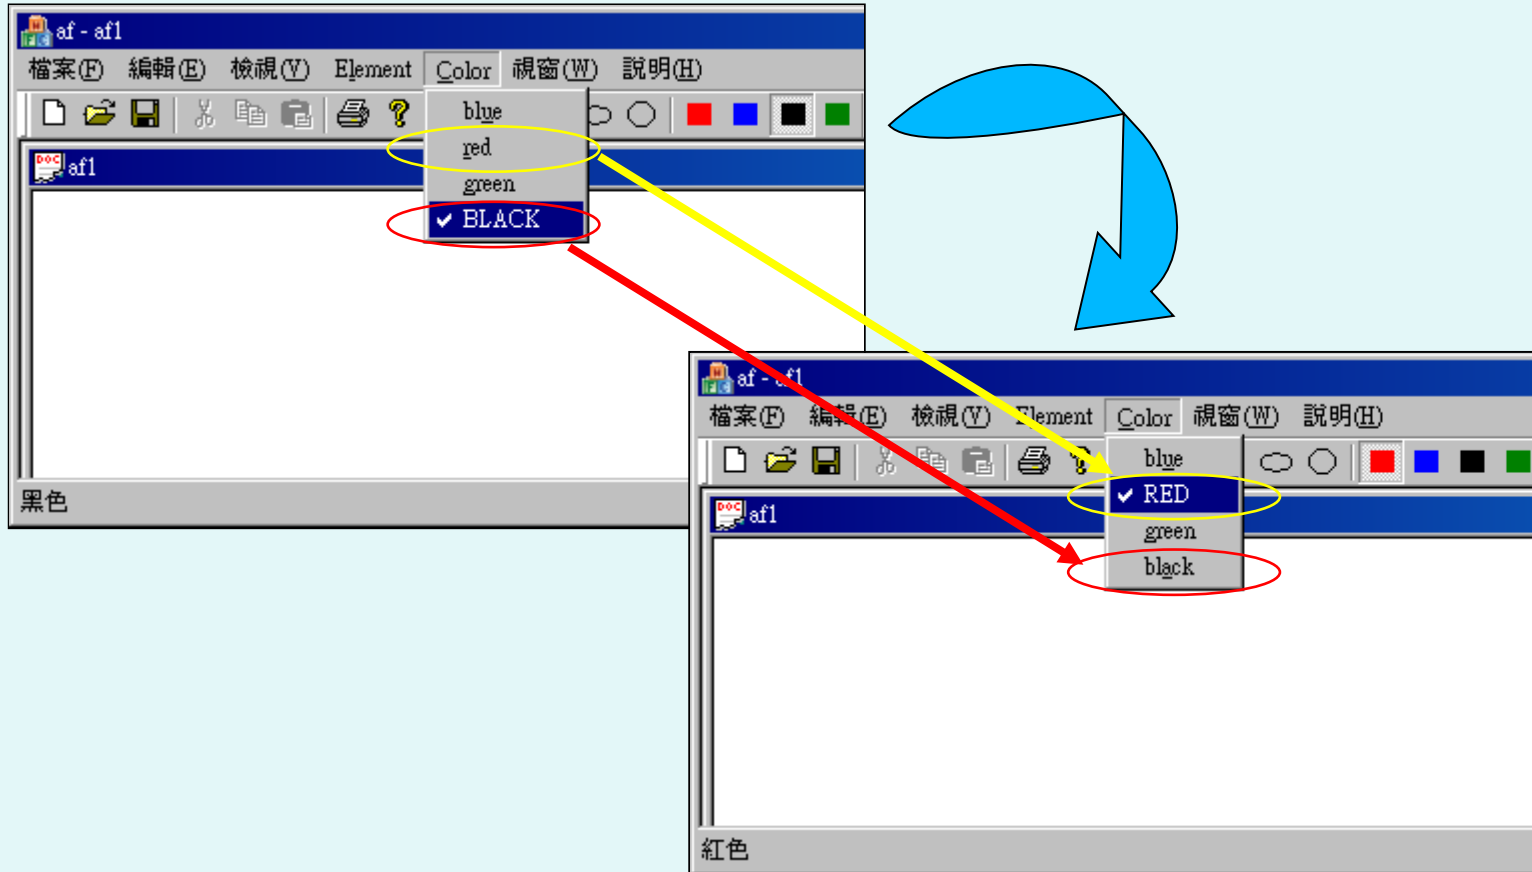

1. Menu item Ellipse

3. Toolbar button and Tooltip for it

2. Implement the command and command update handlers

4. Modify the command update handlers for the color menu items
